

Astro-Tek™

Low-Drip Sanitizing Iodine Barrier Teat Dip

Astro-Tek kills bacteria on contact, forming a coating around the teat for protection against a broad spectrum of mastitis-causing organisms.

Astro-Tek is a unique post teat dip, containing 1% iodine with a 14% five-way emollient system with unparalleled skin conditioning.

Features and Benefits

- **Proven Effective**

In field trials across the U.S., Astro-Tek has been proven to significantly reduce new intramammary infections. The 1% iodine formula of Astro-Tek effectively kills a wide range of environmental and mastitis-causing organisms on contact.

- **Barrier Properties**

The thick consistency adheres to cows' teats delivering peak protection against mastitis-causing organisms when undesirable conditions exist in the cow's environment. The low-drip qualities of Astro-Tek also minimize product waste.

- **Excellent Skin Conditioning**

Enhanced with a 14% emollient package, Astro-Tek softens teats as it protects teat skin tissue from harsh weather and bedding conditions. The five-way emollient package keeps teat ends soft and pliable, improving cow comfort and decreasing skin-related mastitis problems.

- **Excellent Visibility**

A deep, dark brown color stains teats to help milkers and dairy managers verify that teats have been dipped.

- **Easily Removed**

Astro-Tek is formulated for effective and gentle performance, at a pH level that is close to the cow's natural skin. Astro-Tek can be easily removed by the pre-milking hygiene process.

- **Freeze/Thaw Stability**

If frozen, this product can be thawed completely, mixed to its original state and used with confidence.

- **Ready to Use**

No mixing is required.

- **100% Customer Satisfaction**

All GEA Farm Technologies hygiene products have a 100% Customer Satisfaction Guarantee.

Astro-Tek™

Low-Drip Sanitizing Iodine Barrier Teat Dip

Directions for Use

Use at full strength. Do not dilute.

Indications: This topical liquid product, when used undiluted as a post milking teat dip, effectively aids in reducing the spread of mastitis.

Post Dipping: Immediately after milking, dip each teat with Astro-Tek. Allow teats to air dry. Do not wipe. If outside temperature is below freezing, allow to air dry on the teat before the cow leaves the parlor to prevent freezing. At the end of lactation, apply this product daily for one week after the last milking. In addition, begin application of this product about one week prior to calving.

If a common teat dip cup is used for application, a fresh solution should always be used at each milking. The teat dip cup should be emptied, cleaned and rinsed with potable water after each milking session or when cup becomes contaminated during milking. Do not pour remaining solution from dip cup back into original container.

Product Properties

| | |
|---|--------------------------|
| Appearance: | Thick, dark brown liquid |
| Odor: | Iodine |
| pH: | 5.0 (as is) |
| Specific Gravity at 77°F (25°C): | 1.04 (water = 1) |
