

Hydrogen Peroxide Teat Dip

Sanitizing Pre Dip

Features and Benefits

- ★ Contains hydrogen peroxide for a fast and broad spectrum kill of mastitis-causing organisms, reducing the chance of new intramammary infections.
- ★ Two skin conditioning agents enhance teat tissue health and make this product a pleasure for milkers to handle.
- ★ Versatile dip or spray viscosity makes Hydrogen Peroxide Teat Dip an excellent non-iodine alternative for any dairy operation.
- ★ Stable and gentle pH formula provides excellent bacteria killing without the fear of teat tissue irritation.
- ★ Ready-to-use, stable formula.
- ★ Freeze/thaw stable. Excellent shelf-life stability.

Hydrogen Peroxide Teat Dip Sanitizing Pre Dip is a hydrogen peroxide pre-milking teat dip formulated with two skin conditioners to be tough on bacteria, yet gentle on cows' teats and milkers' hands.

Hydrogen Peroxide Teat Dip Sanitizing Pre Dip

Directions for Use

Pre Dipping

Ensure that udders and teats are clean and dry before milking.

- 1) Forestrip and check for clinical mastitis.
- 2) Dip or spray cow's teats thoroughly with this sanitizing teat dip.
- 3) Use individual towels to dry all teats and remove residues.

Product Properties
