

Liquid C.I.P. Detergent

Features and Benefits

- ★ Economical formulation provides dairy producers with a low price-per-container alternative.
- ★ A dilution rate of 1 ounce to 3 gallons delivers adequate cleaning performance in a wide range of milking systems and water qualities.
- ★ Contains powerful alkalinity (sodium hydroxide) for quick removal of milk fats during the wash cycle.
- ★ Excellent sequestration capabilities reduce scale build-ups caused by hardness, minerals or iron present in dairy water supplies.
- ★ Environmentally friendly phosphate-free components are biodegradable and dissipate in sanitary systems.
- ★ Chlorinated formula aids in the thorough removal of milk proteins, reducing build-ups caused by this stubborn milk soil.
- ★ Safe to use. Non-corrosive to stainless steel, glass, plastic, and rubber parts when used as directed.

Liquid C.I.P. Detergent is a phosphate-free, chlorinated alkaline detergent designed for cleaning a wide range of milking systems.

Liquid C.I.P. Detergent

Directions for Use

For cleaning pipelines and milk tanks.

- 1) After milking or as soon as tank is empty, circulate warm (95-110°F, 35-43°C) water through the system and divert to drain.
- 2) Add this product to hot (160°F, 71°C) water at a rate of 1 ounce to each 3 gallons of water. Consult your GEA Farm Technologies Hygiene Specialist or dealer for specific dilution recommendations to ensure proper use and performance of this product.
- 3) Circulate wash solution for 10 minutes and drain quickly. Avoid C.I.P. solution temperatures below 120°F (49°C) to prevent soil redeposition.
- 4) Follow with an acid rinse and drain thoroughly.
- 5) Sanitize prior to milking according to local health department regulations.

Product Properties

Form:	Liquid
Color:	Clear light yellow
Odor:	Mild chlorine
Solubility:	Completely soluble at recommended dilutions
pH:	12.3 (1 oz./gal. water) typical
Specific Gravity:	1.2 typical @ 77°F (25° C)
