

Chlorine Sanitizer

Liquid Chlorinated C.I.P. Sanitizer

Features and Benefits

- ★ 12.5% (by volume) sodium hypochlorite solution provides fast acting sanitizing.
- ★ E.P.A. registration gives dairy producers peace of mind that this product has been thoroughly tested for its sanitizing capabilities.
- ★ Contains sodium hydroxide to maximize product stability and performance.
- ★ Lower pH versus many liquid chlorinated products improves bacteria killing speed and ability.
- ★ Concentrated formula reduces product usage per cycle.
- ★ Phosphate-free formula dissipates in sanitary systems.

Chlorine Sanitizer is an E.P.A. registered liquid chlorinated C.I.P. sanitizer that provides superior bactericidal killing power on hard pre-cleaned milking equipment surfaces.

Chlorine Sanitizer

Liquid Chlorinated C.I.P. Sanitizer

Directions for Use

Sanitize previously-cleaned surfaces by preparing solution strength recommended by local regulatory agency:

Table of properties

100 ppm – 1 oz. to 10 gallons water*

200 ppm – 1 oz. to 5 gallons water

* if chlorine test kit is available, otherwise use at a rate of 1 ounce to 5 gallons (200 ppm).

Product Properties

| | |
|---------------------|---|
| Form: | Liquid |
| Color: | Yellow-green |
| Odor: | Chlorine |
| Solubility: | Completely soluble at recommended dilutions |
| Available Chlorine: | 12.5% (by volume) |
| pH: | 12.5-13.5 s.u. @ 77°F |
| Specific Gravity: | 1.162 @ 68°F for 10.29% NaOCl by wt. |
