

# Barrier 710

**PRODUCT DESCRIPTION** Barrier 710 is a unique fatty acid based barrier teat dip that provides a protective barrier on the teat. Barrier 710 also provides a blend of emollients for superior teat conditioning.

**BENEFITS** **Promotes Udder Health and Hygiene**

- ▲ Contains 0.7% heptanoic acid to provide superior efficacy without the harsh drying effect encountered with some iodophor-based teat dips.
- ▲ Passes AOAC sanitizer test with greater than 99.999% (>5 log) reduction with only 15 seconds of contact time, even in the presence of a 10% milk challenge
- ▲ Equally effective against both contagious and environmental mastitis organisms, such as *Escherichia coli*, *Streptococcus agalactiae*, *Streptococcus uberis* and *Staphylococcus aureus*.

**Gentle, Versatile Formulation**

- ▲ All-season formula provides year-round protection and teat conditioning- contains an emollient system including glycerin and lanolin.
- ▲ Contains a teat marking system to provide visual proof of coverage
- ▲ Easier to remove than latex barrier type teat dips - reduces prepping time.

# Barrier 710

<b>PROPERTIES</b>	Form .....	liquid	100% solution pH .....	4.2
	Color .....	orange	<b>Active Ingredient:</b>	
	Odor .....	herbal	heptanoic acid .....	0.7%
	Spec. Grav. @ 68°F (20°C) .....	1.028	<b>Inactive Ingredients</b> .....	99.3%
	Pounds per gallon .....	8.56	(Contains and emollient system.)	

Formula ingredients contain no phosphorus.

**DIRECTIONS FOR USE** **IMPORTANT:** Do not mix Barrier 710 with water, any other teat dips, or other products unless specified in product use instructions. If transferred from this container to any other, make sure that the other container is thoroughly pre-cleaned and bears the proper container labeling for Barrier 710.

If product in dip cup becomes visibly dirty, discard contents and replenish with undiluted product. Do not reuse or return any unused product to the original container.

**Before Milking:** Wash teats thoroughly just prior to next milking with appropriate udder wash solution or pre-milking teat dip to avoid contamination of milk. Teats should then be dried with single-service towels. Use proper procedures for udder washing or pre-dipping.

**Post-Milk Dipping:** Immediately after each milking, use Barrier 710 at full-strength. Dip each teat full-length into the teat dip cup containing Barrier 710. Allow to air dry. Do not wipe. Always use fresh, full-strength Barrier 710. Do not turn cows out in freezing weather until Barrier 710 is completely dry.

**Expanded Usage:** When freshening cows, begin dipping teats twice daily for about 10 days before calving.

**PRECAUTION:** Barrier 710 is not intended to cure or help the healing of chapped or irritated teats. As with any germicide, irritation or sensitization may occur in sensitive animals. In case of teat irritation or chapping, have the condition examined and, if necessary, treated by a veterinarian.

Consult your MEDA Representative for specific use instructions and recommended dispensing equipment.

For cautionary and first aid information, consult the Material Safety Data Sheet (MSDS) or product label.
