

StarMax 110

Low-Drip Sanitizing Iodine Barrier Teat Dip

Features and Benefits

- ★ Mastitis protection on contact. This ready-to-use 1% iodine formula kills bacteria on contact, preventing or eliminating a wide spectrum of mastitis-causing pathogens.
- ★ The high viscosity of StarMax 110 fully coats and stays on the teats for excellent coverage and protection against mastitis-causing organisms. The thick, dark brown color is very visible on teats.
- ★ Excellent skin conditioning because it is formulated with 10% Glycerin for soft, supple teats.
- ★ Low-drip formula reduces product waste.
- ★ This product is freeze/thaw stable. Frozen product can be thawed, mixed, and used as designed with confidence.

StarMax 110 is a 1% (10,000 ppm) sanitizing iodine barrier teat dip with low-drip properties and containing 10% emollient.

StarMax 110

Low-Drip Sanitizing Iodine Barrier Teat Dip

Directions for Use

Post Dipping

Immediately after milking, dip each teat with this sanitizing teat dip. Allow teats to air dry. If a common teat dip cup is used for application, a fresh solution should always be used at each milking. The teat dip cup should be emptied, cleaned and rinsed with potable water after each milking session or when cup becomes contaminated during milking. Do not pour remaining solution from dip cup back into original container.

Product Properties

Form:	Thick Liquid
Color:	Dark Brown
Odor:	Iodine
pH:	4.6 (as is) typical @ 77°F
Specific Gravity:	1.03 typical @ 77°F
