

Jet Stream 60" Ventilation Fan

High volume, efficient, durable and designed for extreme ventilation applications

The Jet Stream 60" fan is designed for all types of tunnel and cross ventilated dairy barns. This fan is extremely rugged and features unique cast aluminum blades, along with aerodynamic fiberglass housing. Recommended for rough opening of 68 1/2".

Heavy-duty fiberglass housing

Longer life — more durable than a poly housing.

Structurally engineered — reinforced fiberglass at mounting points.

Longer life — no square corners.

Super-duty cast aluminum blade

Airfoil design — strong, efficient and high volume.

Performance at high static pressure

Unique spider design

Ribbed spider — stops blow back.

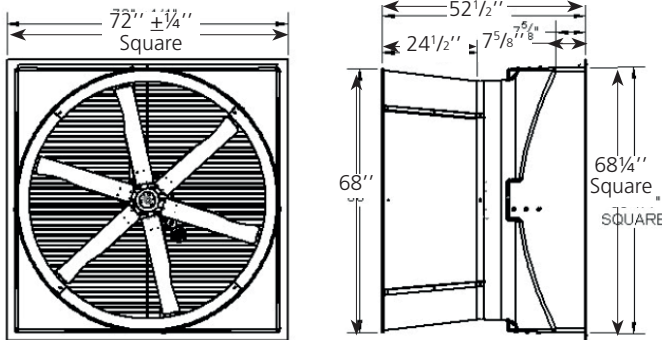

Split blade mounting — stronger and less torque on the mounting bolts.

2 7/8" taper lock hub — easy on and easy off design is rated up to 10 HP.

Heavy-duty shaft and bearings

1 1/4" drive shaft — built to withstand high torque situations.

Service-free bearings — minimizes required maintenance.
