

# Santex™

## Udder Cloth Detergent

Santex is an udder cloth detergent that effectively cleans and softens udder cloths, and is specifically formulated for dairy farm use.

### Features and Benefits

- **Powerful Cleaning Agents**

The powerful cleaning agents and sequestration system of Santex are specifically designed to lift away heavy soils from the cloth fibers, and to minimize staining.

- **Energy Efficient**

Using Santex can help reduce energy bills in two ways:

1. The cleaning capabilities of Santex are effective in cold water. Hot water is not required.
2. Cloths only need to be spun dry in the washer to be fully cleaned with Santex. No drying in a dryer is necessary. This allows for a slightly moistened towel to clean teats more effectively and be gentler on the teat skin.

- **One Step Process**

Save time and money by eliminating the two-step process of laundry. With Santex, cloths only need to be washed, not washed and dried. Also, there is no additional process of adding bleach to the wash load.

- **No Spilling or Splashing**

With no need for bleach, safety concerns over spilling and splashing bleach into the eyes or on the skin are erased.

- **Extends Cloth Life**

The active ingredients in Santex are much gentler than bleach, reducing stress and wear on the cloth, and extending cloth life and durability.

- **100% Customer Satisfaction**

All GEA Farm Technologies hygiene products have a 100% Customer Satisfaction Guarantee.

Udder Cloth Detergent

## Directions for Use

### NOT FOR HOME LAUNDRY USE.

For standard top loading washers, use 1/2 cup (4 oz./113 gm) per load. More product may be needed if cloths are heavily stained or soiled. In front loading washers, slightly less may be used. Add Santex detergent to your wash water first, then add udder cloths. The temperature of the wash water should be warm to hot for more effective soil removal.

**Note:** Santex will clean cloths in cold water, but to more effectively lift soils and remove stubborn stains, warm to hot water is recommended.

## Recommendations for Towel Storage

- Always use two separate baskets, one for dirty towels and one for clean towels.
- Wash both towel baskets weekly, or at the sign of any contamination.
- Store towels in a clean, dry place when not in use.
- Do not store near potential sources of contamination.
- Avoid storing more towels than will be used in the next two milkings.

**NOTE:** Towels left in washing unit may be used within 12 hours.

## Product Properties

<b>Appearance:</b>	White powder
<b>Odor:</b>	Sweet perfume
<b>Solubility:</b>	Complete at recommended use dilutions

## Ordering Information

### U.S. & Canada

SKU	Description
7751-0040-070	Santex - 35# pail (15.9 kg)
