

# Challenger 40 (36" and 42") Herringbone Stall

The classic herringbone stall that delivers  
high value at a competitive price

engineering for  
a better world

[gea.com](http://gea.com)

The Challenger 40 (36" and 42") is a full featured, value-oriented herringbone stall that sets high standards of performance at an affordable price. GEA will design a floor plan to meet your exact needs. Give us your specs and we'll prepare the blueprint.

**Greater cow comfort** — new "S" rail design and sloped rear splash shields conform to the cow's shape for greater cow comfort and operator access to the udder.

**Excellent visibility and access** — suspended rear stall design means no columns blocking access to cows and results in excellent visibility for the operator. Sloped back end also provides easier access.

*Operator benefits from open access and visibility.*

**Choice of exit design** — choose conventional or rapid group exit.

**Fast loading** — large entrance lane and straight brisket rail speeds cow loading.

**Greater space efficiency** — 36" stall center allows more stalls in less space. 42" stall center allows for the highest level of visibility available in a GEA herringbone stall.

**Heavy-duty construction** — 4½" main support columns, 2" x 6" crossbeams, 11 gauge curbing, 12 gauge splash shields for longer life and lower maintenance costs; crossbeam support of stalls offers unsurpassed structural integrity.

**Easy installation** — crossbeam superstructure makes installation and future upgrades easier; minimum 7½ ft. ceiling clearance fits easily into most existing structures.

**Wide selection of sizes** — choose from double 4 to double 20 configurations.

*42" version allows for installation of an arm take off (comfort arm).*

*Shown with optional top mounted positioning guides.*

Options
• Stainless steel brisket rail
• Stainless steel back end
• Stainless steel rust shields for main posts
• Stainless steel curbing
• Stainless steel cantilevered curbing
